ZEPHYR GLOSS SCREEN INKS

ZEPHYR GLOSS screen inks are designed for high speed printing of rigid P.V.C., polystyrenes, and self-adhesive vinyls. These inks are non-toxic and lightfast, they dry to a high gloss finish and have very low odour. They possess excellent screen stability. Zephyr Gloss inks offer exceptional printability and definition, with freedom from static problems.

PRINTING & MILEAGE: Photographic or lacquer proof stencils, using meshes from 100 – 120T. A coverage of 75 –95 sqm/kg can be expected from a 120T.

THINNERS: 15 – 20% for manual printing, and up to 30% for automatic machines.

Thinner	R99
Retarder	R108

DRYING: Jet dry in about 15 seconds at 60 C. Air drying in 10 – 15 minutes depending on ambient temperature.

COLOURS: A full range of non-toxic lightfast colours. Please consult our sales office.

PROPERTIES: Self adhesive vinyls, Polystyrenes, Paper, Board, CAB. Suitable for stickers, toys and labels.

CAUTION: Special care should be taken when printing plastics. Due to variations in materials used in the manufacture of certain plastics, it is recommended that all plastics are pretested before starting production runs. Some plastics contain lubricants and plasticisers, which can impair the adhesion of inks, and may affect the block resistance. This can often be overcome by wiping the plastic surface with a white spirit soaked cloth before printing.
